PROFILE

Senior .NET Core Full Stack Developer with 4+ years of experience designing and delivering high-throughput financial platforms serving thousands of end users. Specialises in ASP.NET Core Web API, microservices architecture, JWT-secured RESTful services, and Entity Framework Core on Azure-hosted infrastructure. Proven track record of resolving critical production incidents, integrating AI-driven payment workflows, and shipping reliable, tested software across Agile release cycles.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET Core, ASP.NET Core, ASP.NET MVC, Web API, Angular, TypeScript, JavaScript, HTML5, CSS3, SQL, LINQ, Entity Framework Core

Backend & API: RESTful APIs, Microservices, JWT Authentication, Role-Based Authorization, Dependency Injection, Repository Pattern, Clean Architecture, Middleware, Swagger / OpenAPI, Async/Await

Database: Microsoft SQL Server, Entity Framework Core, Stored Procedures, Query Optimisation, Database Design

Testing: xUnit, Integration Testing, Postman, Swagger

Cloud & DevOps: Microsoft Azure, Azure App Services, Azure Storage, Azure DevOps, TFS, Git, Release Management, IIS

PROFESSIONAL EXPERIENCE

Infosys Limited — Senior System Engineer May 2022 – Present

- Engineered and maintained customer-facing web and mobile applications (Android & iOS) for a financial services client, supporting account management, payment transactions, and financial reporting for ~50,000 active users.
- Designed RESTful APIs with ASP.NET Core Web API and C#, cutting average API response time by ~30% through async/await refactoring and EF Core query optimisation.
- Implemented JWT and API Key authentication across 15+ service endpoints, eliminating unauthorised access incidents and meeting security audit requirements.
- Led integration of AI-driven ACH payment workflows — automating account setup and payment scheduling — reducing manual processing effort by ~40%.
- Diagnosed and resolved 20+ high-severity production incidents with structured root cause analysis, achieving an average MTTR of under 4 hours and maintaining 99.5% service uptime.
- Collaborated across business, QA, and engineering in an Agile team of 12, consistently delivering sprint commitments and supporting both Android and iOS production deployments.

PROJECTS

Loan Management Platform (Finance Domain) — Infosys 2022 – 2026

- Built ASP.NET Core Web APIs powering loan account management, payment tracking, and customer-facing services for a major lender, processing 10,000+ transactions per month.
- Used C#, Entity Framework Core, and SQL Server to implement complex business logic for loan lifecycle management, reducing backend processing errors by ~25%.

ACH Payment Processing Platform (Finance Domain) — Infosys Jan 2026 – Present

- Developed secure RESTful APIs for ACH payment processing, account verification, and transaction scheduling, handling real-time payment events with sub-second response times.
- Implemented JWT authentication and role-based authorisation across all API endpoints, passing third-party security audit with zero critical findings.
- Optimised EF Core queries and stored procedures, reducing average DB query time by ~35%; actively participated in Agile sprints, code reviews, and production deployments.

Customer Portal & Agent Read-Only Access — Infosys 2026

- Built a secure ASP.NET Core microsite to issue and validate JWT access tokens for agent authentication using Experience Services and Domain Services patterns.
- Implemented role-based authorization and token validation to enforce read-only access policies across customer data APIs, following clean architecture and SOLID principles.

Book Store E-Commerce Application — Self-Developed (GitHub) Personal

- Built a full-stack online bookstore with ASP.NET Core MVC, EF Core, and SQL Server; features include cart management, order processing, and full admin CRUD.
- Applied Dependency Injection and Repository Pattern throughout; added structured logging and input validation, resulting in a clean, testable codebase used as a portfolio reference.

CERTIFICATIONS

- Infosys Certified .NET Core Angular Developer
- Infosys Certified C# Programmer
- Infosys Certified L1 Junior Microsoft .NET Programmer

AWARDS

- Infosys SPS Award (2025) — recognised for successful delivery of AI-driven ACH payment integration, praised for resolving a critical production outage, and acknowledged for managing Android and iOS production release cycle independently.

EDUCATION

Bachelor of Engineering — NKOCET | 2016 – 2020
